### Detailed Action

1. This Office Action is for amendment 2/7/2011.

### Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

Claims 41, 45-55 are allowable over the prior art of record. The prior arts fail to teach the allowable features, singly, particularly, or in combination or rendering with obviousness.

Applicant amended claim 41 to include the previously objected limitations from claims 42-44, & amended claim 45 to also include the similar limitations in claim 41. Claims 1-40, 42-44, 56-57 are canceled. The prior arts fails to disclose the limitations objected in claims 42-44 such as underlined in claim 41 below.

The dependent claims are also allowable due to their dependency upon the allowable independent claims above and the having additional claimed features.

claim 41. (Currently Amended) A method of synchronizing one or more complementary multi-media effects with an audio file in a mobile communications device, the method comprising:

selecting a sample from an audio file stored in memory in a mobile communications device;  
analyzing said sample to calculate synchronizing information sectioning said sample into a plurality of measures, each said measure comprising an equivalent number of notes; determining the notes that occur within a desired beat in each said measure; and calculating a weight value by summing a velocity parameter of a corresponding note-on event for each said note that occurs within said desired beat in each said measure and  
generating a pattern in which to render one or more complementary multi-media effects in the mobile communications device synchronously with the playback of the audio file based on the calculated synchronizing information.

The closest prior art, **Dowling** [ US 2002/0038,157 ] discloses the synchronizing by analyzing the audio file in frequency & time domains in paragraph. 0107/0106; the generating light control signal based on the analyzed activities of the received audio signal, paragraph 0118/0120, but fails to disclose the allowable limitations as underlined in claim 1 above.

**Hayashi** [ GB 2,380,908 ] discloses the synchronization according to the music playing information 501-503, to turn on/off LED/vibrator, page 9, line 22 to page 10, line 15].

**Armanto et al.** [ US 6,094,587] discloses the user can set the tempo from user interface keyboard or touch display [ col. 13, lines 27-35 & col. 9, lines 65-67 ].

Other prior arts in below are also considered, but they fail to teach the above allowable features.

Chung [ US 2003/0162,571 ], Nishitani [ US 2003/0045,274 ], Matsuda et al. [ US 2001/0014,616 ], Ito [ US 6,597,928 ], Kawasaki et al. [ US 2002/0142,810 ], Kim [ US 6,278,884 ], Brown et al. [ US 2005/0190,199 ], Aoki [ US 2001/0012,793 A1], Futamase et al. [ US 2003/0224,767].

Other prior arts are also considered. They are: **Marovitz [ US 2007/0021,936 A1]**,

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
